

CALIBRE

Academy Laser Clinics are specialists in penis augmentation using injectable dermal fillers. CALIBRE penis augmentation is a 1 hour painless procedure that uses safe, natural-feeling, Long-lasting and fully reversible cosmetic dermal filler to increase penis size.

Who A Good Candidate For CALIBRE?

Somebody with any of the following:

- A below 'average' penis girth or width.
- A lack of confidence as a result of penis size.
- Realistic expectations of what can and cannot be achieved using injectable filler.

Not all CALIBRE patients fall into the above categories; in fact 30% of patients are above 'average' in size, and would simply like to be even larger, which is fine. These patients are also suitable for CALIBRE.

How CALIBRE Works:

The dermal filler we use works just like it does on the face and other body parts. It is injected just below the surface of the skin and is naturally integrated into the penile tissue after about 1 week. Up until then, the product can be gently massaged to smooth out any bumps and ensure even coverage.

It takes a couple of weeks for the dermal filler to stabilize, absorb water and look its best, after which it is slowly metabolized and reabsorbed by the body over time.

What Results Can I Expect?

- Your Augmentation will depend on your natural penis size and the volume of filler injected.
- The maximum filler injected in a single session is 15mls, which produces a noticeably larger penis size. You may have progressive top-ups until your desired result is achieved.
- Most men aim for a 15% – 30% increase in the circumference of the shaft of the penis.
- With greater volumes, 15mls or more, the extra weight tends to result in some lengthening too.
- You will notice less "shrinkage" when cold or embarrassed.
- What about when erect? There will be a measurable increase in girth based upon the volume of filler injected.

Progressive treatments are available if you wish to increase size further. Treatments scheduled within 4 months of first session will only be charged the incremental fee to the applicable higher package.

Existing Patients will be entitled to 10% discount on the standard rates for future treatments beyond 4 months.

How Long Will The Results Last?

We expect CALIBRE to last for 18 – 24 months, sometimes longer, but may require small top ups to maintain desired results. Fortunately our dermal fillers are completely and rapidly reversible, so any problems (which should be minor and uncommon) are totally reversible. The longevity can also depend on factors such as your natural metabolism and exercise.

Consultation

An initial consultation with the doctor is required prior to going ahead with the procedure. During this consultation, the doctor will discuss your concerns about penis size and explain the CALIBRE procedure and the likely outcomes.

It is important your perception of size is discussed and you have clear and realistic expectations of what CALIBRE penis augmentation can do for you. This will be addressed during your consultation and we encourage you to raise any questions or concerns so these can be resolved prior to treatment.

The treatment program will be scheduled over 1-3 sessions, 4 weeks apart, depending on the total volume and your unique circumstances.

How Much Does CALIBRE Cost?

Your initial consultation carries a fee of \$100. The standard pricing for CALIBRE penis augmentation is based on the volume of dermal filler required, as follows:

First Treatment:

Glans Only (3mls):	\$1,950
Silver Package (7mls):	\$4,200
Gold Package (10mls):	\$5,700
Platinum Package (15mls):	\$8,100

Package prices for larger volumes can also be quoted during your consultation or on the day of treatment.
